Words from the Director of Facilities

ADAPTATION...

The Adaptive Remodel Project began in full force this month utilizing VAI Architects and Joe Funk Construction. These are the same two firms that designed and built the beautiful new Richland College Garland Campus.

All divisions of Facilities Services have responded quickly and efficiently to the decisions, plans and moves for this extensive updating of the campus. Approximately 80% of current structures are being affected to some degree with changes to classrooms and offices.

In addition to the contractor's work, Facility forces will also be heavily involved beginning in March with renovation and the retrofit of spaces in El Paso, Thunderduck, Crockett, Pecos, Medina and Wichita.

If your birthday is in February and your name wasn't listed. Please let us know in P131.
